# Study Guide

Linux Basics (R23CP2401) is a theory subject worth 4 credits. Coverage focus: Linux structure, filesystem navigation, commands, permissions, vi editor, pipes/redirection and basic shell scripting.

## Key Topics to Study

- Linux structure
- filesystem navigation
- commands
- permissions
- vi editor
- pipes/redirection

## How to Study This Subject

- Watch the primary YouTube lecture playlist first
- Take notes while watching — write key terms and formulas
- If a topic is unclear, watch the alternate playlist
- For programming subjects, type out every code example yourself
- Use Ask LEO to clarify any doubts
- Practise with quiz questions after each topic

## Exam Tips

- Focus on the coverage focus topics — these align with your CWIT R23 syllabus
- Review the primary lecture playlist before exams
- Practise numerical problems and code examples
- Time yourself while practising
