Verification and study notes

- 1 The subject list and course codes are based on the supplied CWIT R23 curriculum research for CP and CI.
- 2 The links in this guide were selected as public YouTube lecture/tutorial resources and checked through web search on 28 June 2026. YouTube titles, availability and playlist contents can change later.
- 3 The primary playlist is the best starting point found, but it may not follow CWIT's unit order exactly. Always compare the playlist with your current classroom syllabus, teacher instructions and laboratory manual.
- 4 For practical subjects, video watching is not enough: repeat the commands, coding exercises, drawings, hardware setup or circuit work yourself.
- 5 Communication, life-skills, yoga and meditation subjects depend heavily on classroom activities and internal assessment; the listed videos are supplementary.

Recommended Lernio integration order

- 1 Programming in C, Basic Mathematics, Applied Mathematics, Linux Basics
- 2 Web Page Designing, Engineering Graphics, Basic Science, BEEE for CI
- 3 ICT, Workshop Practice, Communication, Social/Life Skills, Yoga
