Study Guide

Engineering Workshop Practice (R23CP6401) is a practical subject worth 4 credits. Coverage focus: PC components and assembly, storage/OS setup, peripherals, basic LAN, maintenance and troubleshooting.

Key Topics to Study

- PC components
- assembly
- storage/OS setup
- peripherals
- basic LAN
- maintenance

How to Study This Subject

- Watch the primary YouTube lecture playlist first
- Take notes while watching — write key terms and formulas
- If a topic is unclear, watch the alternate playlist
- For programming subjects, type out every code example yourself
- Use Ask LEO to clarify any doubts
- Practise with quiz questions after each topic

Exam Tips

- Focus on the coverage focus topics — these align with your CWIT R23 syllabus
- Review the primary lecture playlist before exams
- Practise numerical problems and code examples
- Time yourself while practising
