

Microprocessors and Its Programming

Subject Code: R23CP2403

Semester 3 · 5 Credits · Theory · CWIT R23

2 Curated YouTube Lectures

Comprehensive Study Notes with Curated Lectures, Study Guide & Practice Questions

Lernio AI · Learning OS 2.0

Coverage Focus

Processor architecture, registers, memory, addressing modes, instruction set and assembly-language programming.

Curated YouTube Lecture Resources

These playlists have been curated to match your CWIT R23 syllabus. Start with the Primary playlist, then use Alternate playlists for different explanations.

Primary Lecture 1: Microprocessors and Microcontrollers

Channel: Neso Academy · Language: en

URL: https://www.youtube.com/playlist?list=PLBlnK6fEyqRgyFCCgqdcBowmSp_BTks4F

Strong conceptual coverage of architecture, instruction sets and interfacing.

Alternate Lecture 1: Microprocessor and Microcontroller

Channel: Gate Smashers · Language: hi-Hinglish

URL: <https://www.youtube.com/playlist?list=PLBIfK3DghyO6SVpIKk3QnToRTawKj6LaF>

Exam-friendly explanations and another route through architecture and programming topics.

Study Guide

Microprocessors and Its Programming (R23CP2403) is a theory subject worth 5 credits. Coverage focus: Processor architecture, registers, memory, addressing modes, instruction set and assembly-language programming.

Key Topics to Study

- Processor architecture
- registers
- memory
- addressing modes
- instruction set
- assembly-language programming.

How to Study This Subject

- Watch the primary YouTube lecture playlist first
- Take notes while watching — write key terms and formulas
- If a topic is unclear, watch the alternate playlist
- For programming subjects, type out every code example yourself
- Use Ask LEO to clarify any doubts
- Practise with quiz questions after each topic

Exam Tips

- Focus on the coverage focus topics — these align with your CWIT R23 syllabus
- Review the primary lecture playlist before exams
- Practise numerical problems and code examples
- Time yourself while practising
